Attn: Mr. Bob Bell

Dear Mr. Bell,

Per the letter from John T. Kraft, of the DNR, Water Quality Division on December 11, 1978, Ren Plastics does not comply with Act 288, Public Acts of 1972.

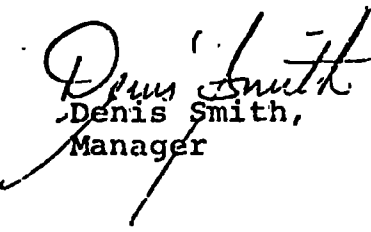

The sanitary sewage wastes at Ren flow to a septic tank in front of the building with the top-flow pumped to a drain field. Arrangements are being made with a contractor to connect the sanitary effluent from the building to the City of Lansing Sanitary Systems. Work on this project can not be started with the ground frost therefore, proposed completion date has been set for June 1st, 1979.

The non-contact cooling water used for pilot plant equipment will remain in the storm drain pending approval of the discharge permit to the Department of Natural Resources.

If you have any questions concerning the proposed connection, please feel free to contact us.

Sincerely,

REN PLASTICS

Denis Smith,
Manager
